Web and Software Developer

Junior Developer

As an aspiring Junior Web and Computer Developer, I have successfully built and deployed websites and software applications, showcasing a strong foundation in both front-end and back-end development. Through my certification and degree program, I have gained proficiency in key technologies such as HTML, CSS, JavaScript and frameworks like React, alongside programming languages such as Python and C#. My experience includes debugging, optimizing, and maintaining code to ensure functionality and efficiency. I am passionate about learning and eager to collaborate with experienced professionals to further develop my technical skills and contribute to innovative digital solutions. My adaptability, problem-solving mindset, and commitment to clean code make me a valuable addition to any development team.

Skills

- Attention to Detail
- RESTful APIs
- OOP
- Problem-Solving
- Data Structures & Algorithms
- Web Development
- Version Control
- Agile & Scrum
- Critical Thinking
- Debugging
